KNOWING BIRDS THROUGH STORIES

By Floyd Bralliar

THIS book is made up of charming true stories about birds, showing their human-like loves and hates and jealousies, and is based upon the author's experiences with the feathered flyers while a youth on his father's farm in southeastern Iowa. After reading it even a boy should be able to name many birds on sight. The work is liberally illustrated with attractive bird pictures, twelve of them being full-page plates in bright colors that were made from paintings by E. R. Kalmbach, assistant biologist, United States Department of Agriculture. The book is recommended for adults as well as children, being both highly instructive and intensely entertaining.

12mo, Cloth, 355 pages.
$2, net; $2.12, post-paid.

KNOWING INSECTS THROUGH STORIES

By Floyd Bralliar

IN this delightful book the author gives a vivid and faithful portrayal of insect life, revealing the curious and little-known habits of bugs—how June Bugs court and dance, how Hornets make good quality paper, how Ants milk their cows—plant and raise crops—build their roads and houses, how the Praying Mantis devours her relatives and even eats her husband while on her honeymoon, how Queen Bees get jealous, etc. The work is illustrated with photographic reproductions, many of them in bright colors, and will prove interesting to any one. Children especially will enjoy becoming acquainted with "the little folk that live in the great out-of-doors" through this book.
